Developer-Centric Test Amplification

+

The Interplay Between
Automatic Generation and Human Exploration

Test Generation

Fully automatic → what about the developer's expertise?

Test Generation

Fully automatic → what about the developer's expertise?

Developer-Centric Test Generation

Developer accepts test case
into maintained test suite

Developer-Centric Test Amplification

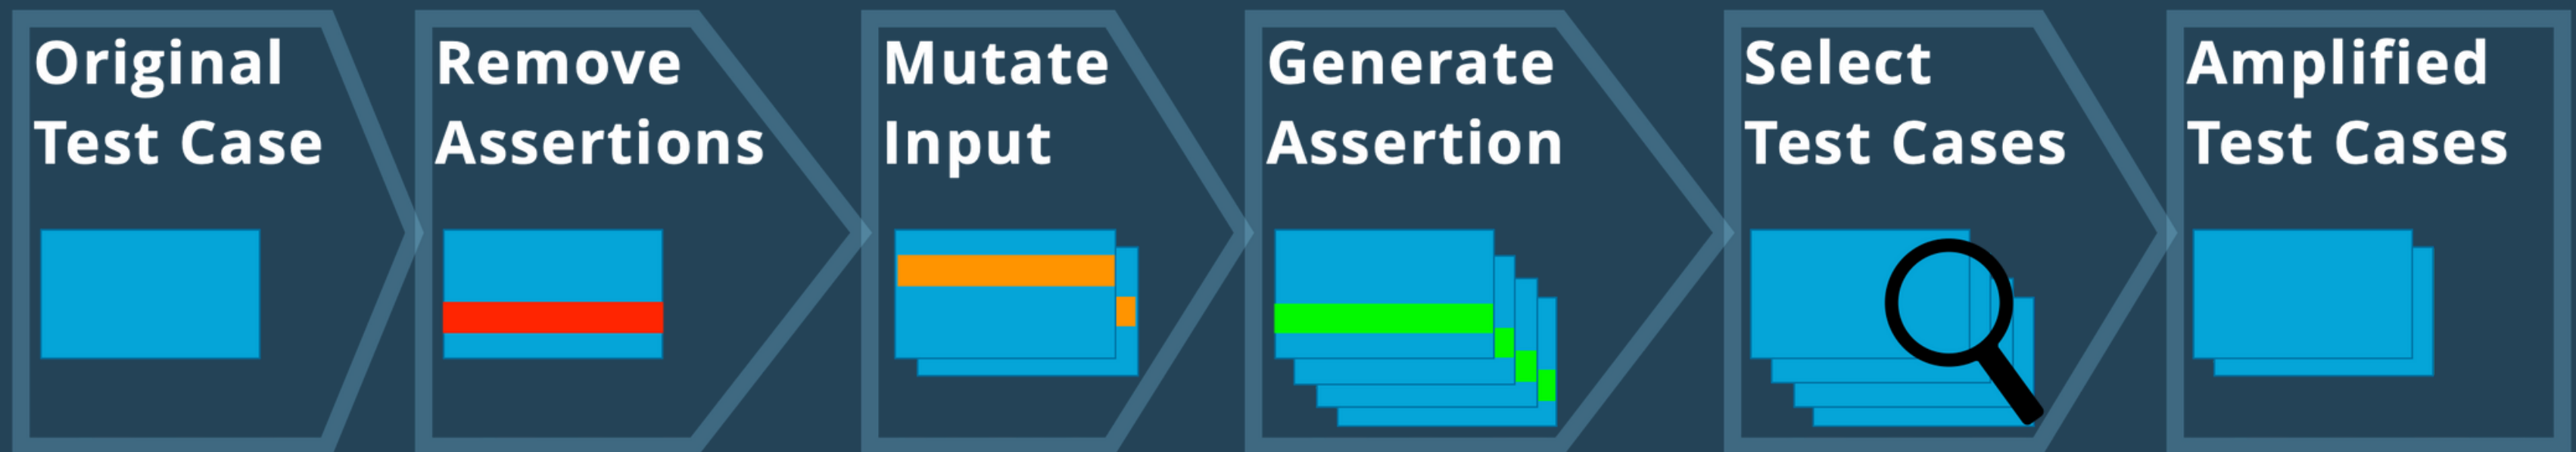

Generate new tests....

- that improve the test suite
- based on existing ones

Developer accepts test case
into maintained test suite

Test Amplification

Adapt Amplification Tool DSpot + Exploration IntelliJ Plugin TestCube 

What are the important factors to realize developer-centric test amplification?

(selected)

Observations

TEST CASES	EXPLORATION TOOLS	INFORMATION	VALUE
Consistent	Ease of Use	Outcome, Runtime	Eases Testing
Relevant	Information & Expectation Management	CUT Coverage	Learning
		Original Test	Confidence

Recommendation 1

Consider interaction developers ↔ test cases.

Test Exploration Tool:

- easily accessible
- effectively communicate impact

Recommendation 2

Main goal: developers accept a test case

understandable & relevant

more important than

coverage impact

Take-Away

Building an automated tool? → How do your users discover it?

Understandability could be more important than the optimal result.

Brandt, C., & Zaidman, A. (2021). Developer-Centric Test Amplification:
The Interplay Between Automatic Generation and Human Exploration.
Accepted at EMSE, arXiv:2108.12249.
